Subject: RE: Request for Detailed Data

Jerry,

While I was hoping for specific direction so we are sure to meet the expectations of the DOGGR the first time, we will work with Central and others to develop a testing and data collection program that we believe supports the contribution of the Inergy wells to the enhanced oil and gas production.

Thanks,

Scott E. Jones

Hi Scott,

We will leave it up to Inergy and Central Resources to generate/analyze the data and/or develop a testing scheme to unequivocally prove that Inergy's wells are providing positive benefits to the nearby oil production in the area. Please ensure that these positive benefits cannot be attributable to Central Resources' own waterflood process. Thanks.

Jerry

Hello Jerry,

Thank you for sending this response and including the direction of what you will need from Inergy and Central Resources, is there any specific tests that you would like us to perform on any specific wells either Inergy or Central Resources owned. I would like to make sure we coordinate exactly what is needed to meet the required data.

Thanks,

Scott E. Jones

Subject: Request for Detailed Data

Hi Scott,

Please find attached our letter requesting for more detailed information to indicate that Inergy is operating a waterflood project in the North Coles Levee field.

Thanks and regards,

Jerry Salera
